

Welcome to our
4x4-Chess-Game

Start Game!

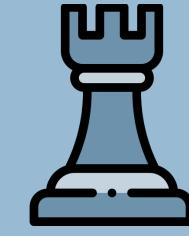

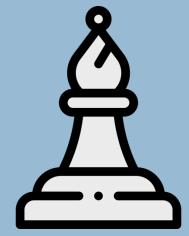

First make sure to read the rules!

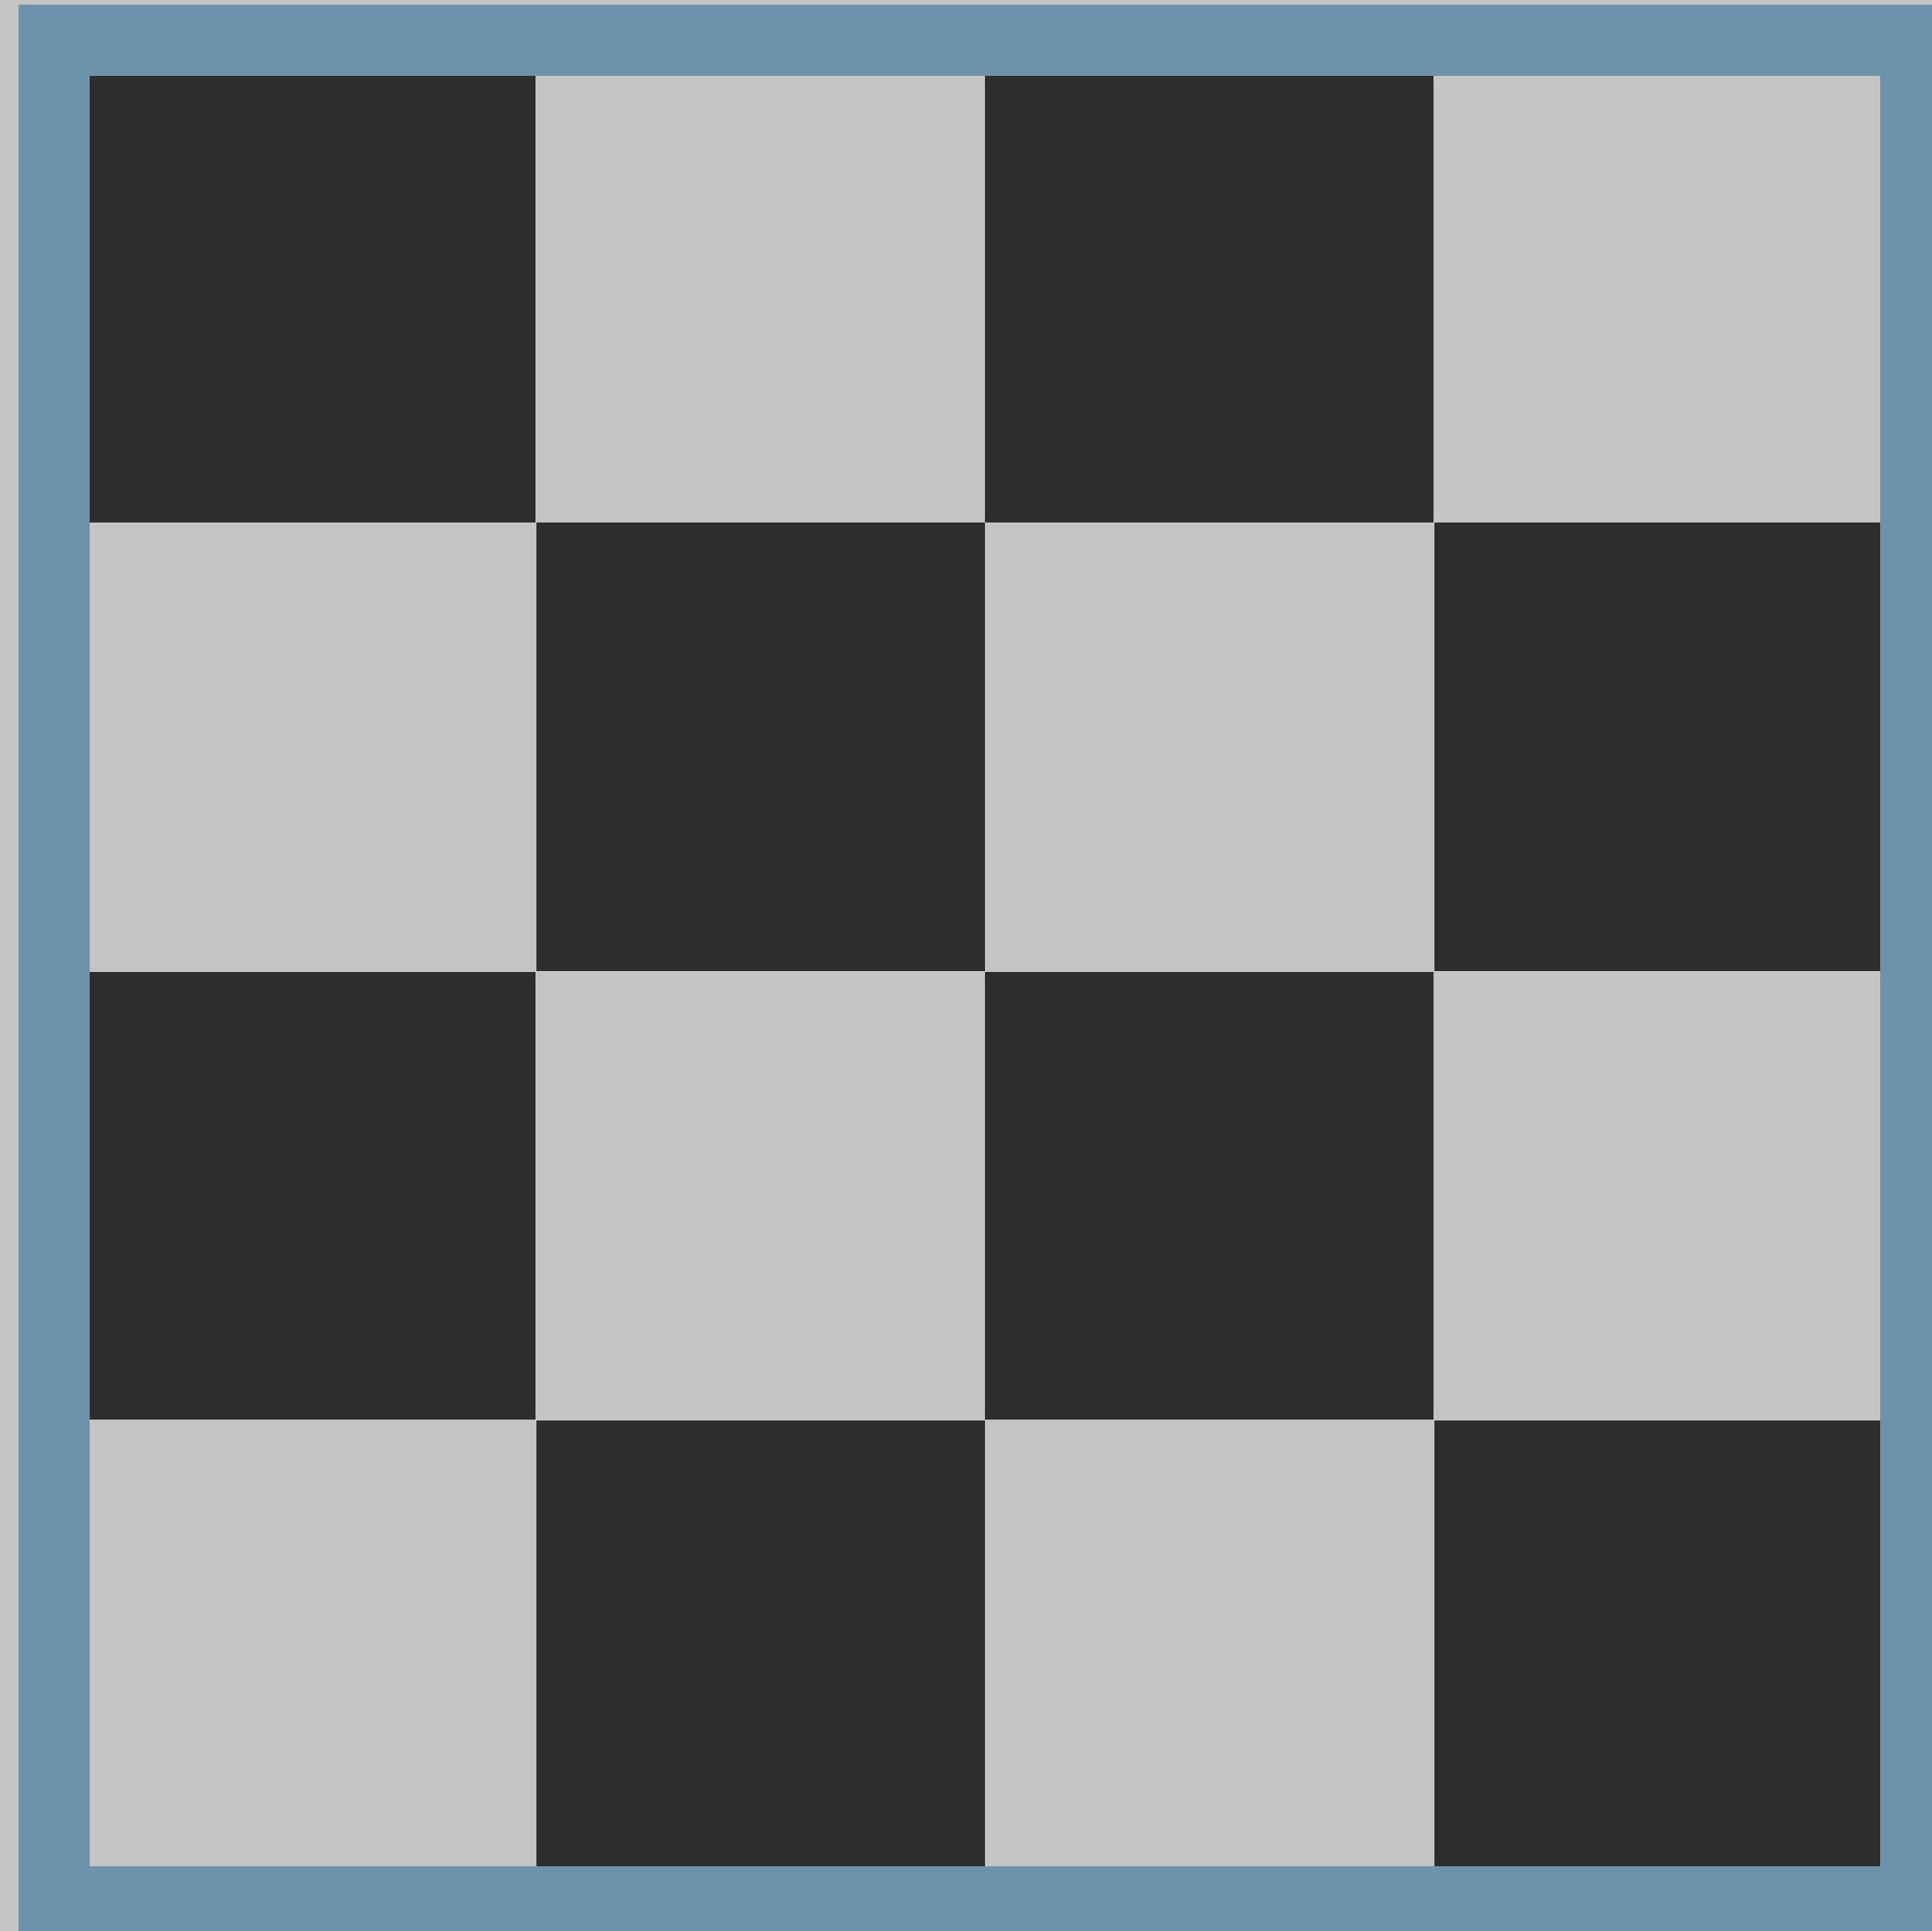

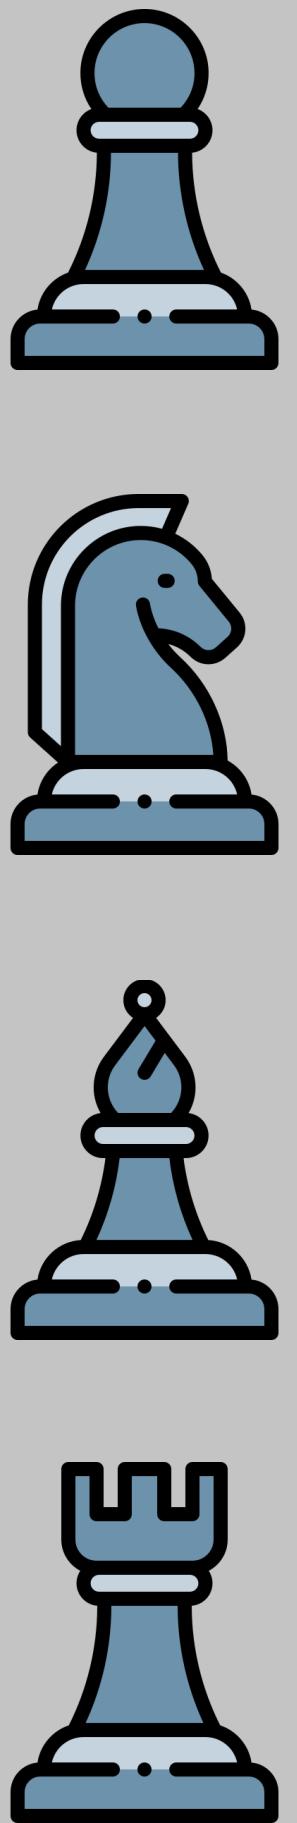

Each player has four pieces: **a knight, a rook, a bishop and a pawn**.

The goal of the game is to be the first to align your pieces in a
vertical, horizontal or diagonal row.

- Game starts on an empty 4 x 4 board and players take turns placing a piece on any open square.
- Once at least three pieces are placed per player, they may move a piece, capture a piece or place their remaining piece.
- Captured pieces are returned to their player and may be replayed on any open square.
